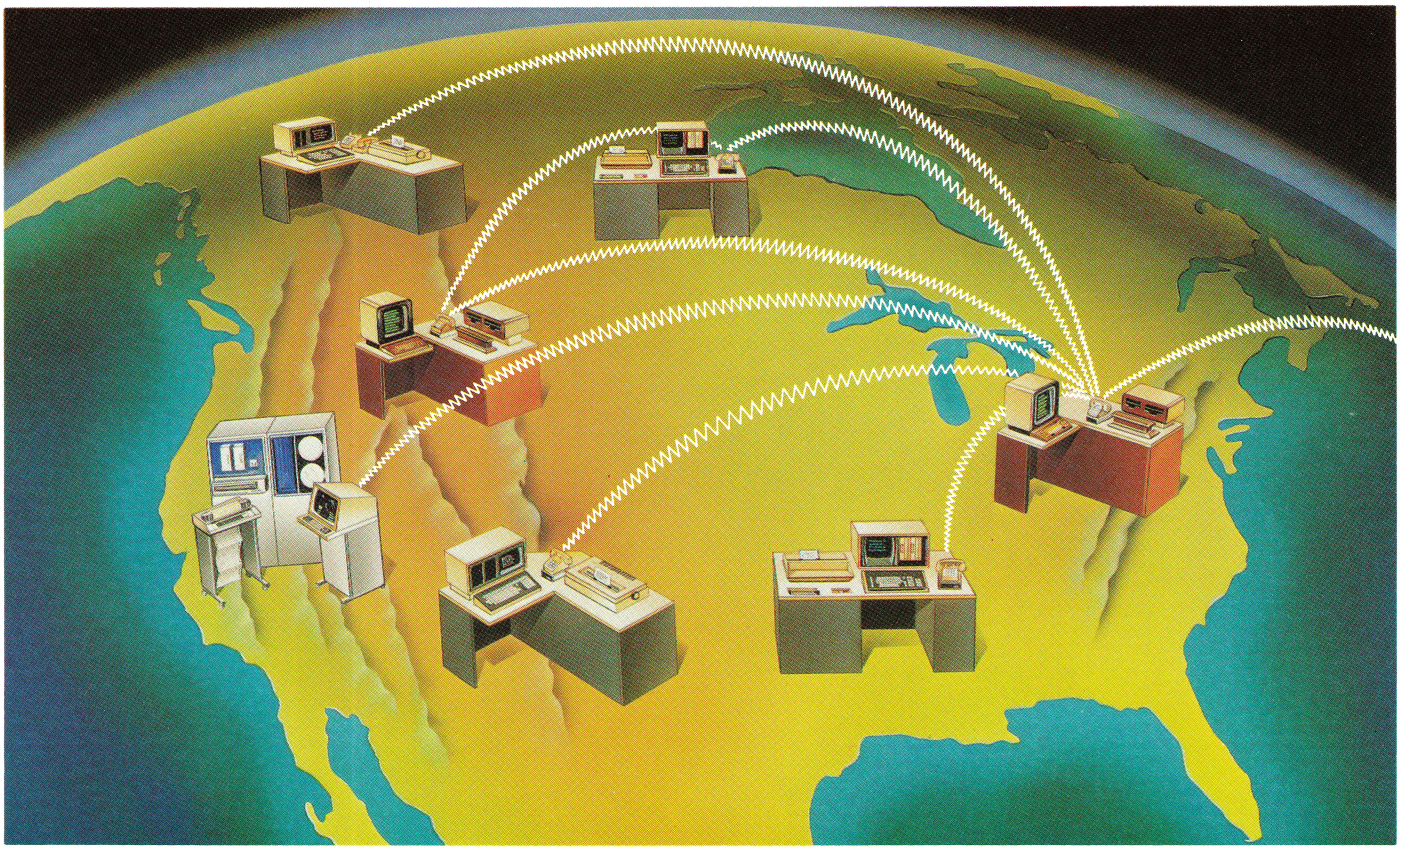
telecommunications

Varityper

The remote connection: typesetting by telephone with the Comp/Edit telecommunications option.



With the innovative Comp/Edit telecommunications option, you can employ virtually instant electronic communications to expand the productivity of your Comp/Edit phototypesetting system.

Communications can be between two Comp/Edit units, other devices such as word processors, computers, networks, and other RS-232 connections.

System features

- Operates in terminal or unattended slave mode; operates with auto-answer modem.
- Bi-directional file transmission to/from computers, word processors, other phototypesetters, or other devices capable of storing binary information.
- Automatic translation of input codes into Comp/Edit code set.
- Standard procedures and translations are storable in files or can be downline loaded from the source.
- Typeset formats can be converted automatically from computer formats, or can be created by simple text or mnemonic callouts.

For example, copy that has been input and edited on a Comp/Edit terminal or a word processor in a business office can be transmitted directly into the Comp/Edit phototypesetter in another department, or to a printer or typesetter across town or across the country. There is no re-keyboarding, no time lost for delivery of manuscript.

Specifications

Transmission Rates: ASCII point-to-point dial-up at selectable speeds of 110, 300, or 1,200 b.p.s. Up to 9,600 b.p.s. hard wired.

Translation: Any identifiable code set can be received and automatically translated into Comp/Edit code set. Capability includes code correction, mnemonic input, string substitution, repeated-character deletion, and/or delete 1-to-n characters within specified code string. General-purpose translation provided is fully user programmable.

Recommended modems: 103J compatible for speeds up to 300 b.p.s.; 212 compatible for speeds up to 1,200 b.p.s. Modems are user-supplied; must conform to EIA RS-232-C, CCITT V .24 specifications.

Specifications subject to change without notice.
